

PROPANE DISTRIBUTION

WIRELESS MONITORING SOLUTIONS

SERVICE FEATURES

- Provides propane tank information for level, location, and efficient route planning. Device operates on 3G/4G cellular networks.
- Eliminate propane run-outs and costly emergency deliveries.
- Access to tank information 24/7, anywhere an internet connection is available, via TankData Online.
- Delivery Efficiency Report tracks & calculates potential cost savings.
- Alerts and notifications sent to your desk or in the field.

Is propane inventory up or down? Are your distribution costs up or down? Are you making too many emergency fills? Knowing the answers to these questions impacts your efficiency and profitability. TankLink has been helping propane producers, marketers and distributors optimize their operating efficiency through remote tank monitoring and gain maximum control over propane distribution and overall vessel management.

Discover how our total system solution and direct customer service model can help maximize efficiency – visit www.TankLink.com or call 1-888-TANKLINK.

Increased Efficiency

We offer a proactive supply-chain management approach to servicing end-users.

TankLink makes on-site refills seamless when planning your deliveries: where, how much, and how often – keeping your customers supplied more efficiently.

Our Predictive Efficiency Fill Report provides measurable targets and results data to maximize routing and delivery scheduling.

Improved Forecasting

TankData Online gives you 24/7 access to critical tank level information on your PC, laptop, Smartphone or tablet.

- TankLocator enables asset visibility five different ways, including via GPS.
- Delivery/routing data can be exported to Excel or your routing package.
- Email alerts: Critical low, critical high, short-fill detection, with criteria that you set.

Enhanced Customer Relationship

- TankData Online provides the data that gives you the power to know what your customers need before they even know it, giving them one less thing to worry about.
- Now you can make data driven decisions on inventory replenishment, and plan the most efficient deliveries. That helps improve your overall customer relationship.
- Partner View feature allows you to safely share tank data with 3rd parties.

TANKLINK

PROPANE DISTRIBUTION

WIRELESS MONITORING SOLUTIONS

TankLink understands the propane distribution market and its unique storage and distribution requirements. With the proven single-source propane-specific wireless hardware and data delivery solution we provide, you can be confident of the storage, handling, replenishment and delivery decisions you make.

Our wireless propane telemetry units operate on 3G/4G cellular networks, and are perfect for propane applications, interfacing with the float-type sensor and remote-ready dial face to provide accurate level information. The device then communicates with the TankLink Communications Center via cellular networks, and tank data flows to your PC or mobile device via TankData Online.
